| <b>CONDITIONS SET AS NON-APPLICABLE</b>         | In our company, there is no requirement determined as not applicable within the scope of ISO 9001-ISO 14001 and ISO 45001.                                                                                                                                                                                                                                                                                                                                                          |
| <b>PROPERTY OWNED BY CUSTOMER OR OUTSOURCER</b> | During product realization, customer-owned facilities may be used during assembly within the scope of customer property. The use of these areas belonging to the customer is carried out in accordance with the requirements of the ISO 9001- ISO 14001- ISO 45001 system. Problems and nonconformities detected during or before use are notified to the customer in writing and action is taken according to the written request of the customer. There is no supplier ownership. |
| <b>OUTSOURCED PROCESSES</b>                     | The manufacturing of turbine parts is outsourced.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
